## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Kawakatsu et al U.S. Patent Number 5,119,367.

Re Claim 1, fig. 2(a) teaches at least one counting device 12-1 (measurement module) for counting number (measure packet data traffic) of data packets and outputting results to the Traffic Control Device 240 (at least one estimation module; an admission control module) whereby 240 estimates/computes the effective bit rate (estimated maximal rate envelope) wherein 240 further admits the call in accordance with the computed rate (See col. 10, lines 5-68).

Re Claim 2, refer to Claim 1, wherein 12-1 is associated with 240 wherein these devices are spatially distributed in the switching device of fig. 2(a) of the packet network.

Re Claim 3, refer to Claim 2, wherein 12-1 and 240 are coupled together (a measurement result interface) wherein fig. 7(a) further teaches a RAM 360 (also See fig. 3 (a, b) & 7 (b)) to store results from 12-1 and for storing computed rates by the 240 (a commonly used memory area).

Re Claim 4, refer to Claim 1.

Re Claim 10, refer to Claim 1, wherein 240 controls a switching device 150 of the packet network and further estimates the current state of the connections and available capacity (a report) to perform admission control of the Call request

***Allowable Subject Matter***

3. Claims 5-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

In combination with claims 1, 4, 5, prior art fails to teach estimation module to copy results indicated by the ready indicator.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Lee whose telephone number is 571-272-3130. The examiner can normally be reached on Monday to Friday from 8:30AM to 6:00PM.
